(54) Title: ACTUATING FUNCTIONALITY IN ELECTRONIC DEVICE

(57) Abstract: Arrangement for providing operational settings to an electronic device including a data storage, including at least one data storage element including instructions needed to perform one or more functions in the electronic device. The electronic device includes reading means for reading one or more of the plurality of data storage elements, the electronic device further including controlling means for performing one or more functions defined by the instructions included in the read data storage element included in the data storage.
